Seeing patterns, identifying and formulating rules to be done by children. (As familiarity with) algebra grows, the child can express the generic pattern.).	Students will explore whole numbers and round of nearest places like tens.hundred and thosands.
May	Ch- 3 HCF and LCM	HCF and LCM Playing with Numbers:Simplification of brackets,Multiples and factors, divisibility rule of 2, 3, 4, 5, 6, 8, 9, 10, 11. (All these through observing patterns. Children would be helped in deducing some and then asked to derive some that are a combination of the basic patterns of divisibility.) Even/odd and prime/composite numbers, Co-prime numbers, prime factorisation, every number can be written as products of prime factors. HCF and LCM, prime factorization and division method for HCF and LCM, the property $LCM \times HCF = \text{product of two numbers}$ . All this is to be embedded in contexts that bring out the significance and provide motivation to the child for learning these ideas.	Students find the H.C.F with factor tree method

Unit Test	Ch- 1,2,3		
July	Ch- 4 Integers	Integers :Negative Numbers and IntegersHow negative numbers arise, models of negative numbers, connection to daily life, ordering of negative numbers, representation of negative numbers on number line. Children to see patterns, identify and formulate rules. What are integers, identification of integers on the number line, operation of addition and subtraction of integers, showing the operations on the number line (addition of negative integer reduces the value of the number) comparison of integers, ordering of integers.	Art Integrated activity ..... Student will be represent the integers on number line.
August	Ch- 5 Fraction & Decimal	. Fractions and decimals. Fractions on number line Revision of what a fraction is, Fraction as a part of whole, Representation of fractions (pictorially and on number line), fraction as a division, proper, improper & mixed fractions, equivalent fractions, comparison of fractions, addition and subtraction of fractions (Avoid large and complicated unnecessary tasks). (Moving towards abstraction in fractions) Review of the idea of a decimal fraction, place value in the context of decimal fraction, inter conversion of fractions and decimal fractions (avoid recurring decimals at this stage), word problems involving addition and subtraction of decimals (two operations together on money, mass, length and temperature)	Art integrated activity .... Write fraction corresponding decimal value ., diagram out of 100,
September	First Term Ch 1,2,3,4 and 5		
October	Ch – 6 Elementary Geometrical Shapes	Basic geometrical ideas (2 -D): Introduction to geometry. Its linkage with and reflection in everyday experience. <ul style="list-style-type: none"><li>• Line, line segment, ray.</li><li>• Open and closed figures.</li><li>• Interior and exterior of closed figures</li><li>• Curvilinear and linear boundaries</li><li>• Angle — Vertex, arm, interior and exterior,</li></ul>	Art integrated activity . Draw different types of shapes and write its properties

		<ul style="list-style-type: none"> <li>• Triangle — vertices, sides, angles, interior and exterior, altitude and median</li> <li>• Quadrilateral — Sides, vertices, angles, diagonals, adjacent sides and opposite sides (only convex quadrilateral are to be discussed), interior and exterior of a quadrilateral.</li> <li>• Circle — Centre, radius, diameter, arc, sector, chord, segment, semicircle, circumference, interior and exterior.</li> </ul> <p>(ii) Understanding Elementary Shapes (2-D and 3-D):</p> <ul style="list-style-type: none"> <li>• Measure of Line segment</li> <li>• Measure of angles</li> <li>• Pair of lines</li> <li>– Intersecting and perpendicular lines</li> <li>– Parallel lines</li> <li>• Types of angles- acute, obtuse, right, straight, reflex, complete and zero angle</li> <li>• Classification of triangles (on the basis of sides, and of angles)</li> <li>• Types of quadrilaterals –Trapezium, parallelogram, rectangle, square, rhombus.</li> <li>• Simple polygons (introduction) (Upto octagons regulars as well as non regular).</li> <li>• Identification of 3-D shapes: Cubes, Cuboids, cylinder, sphere, cone</li> </ul>	
November	Ch – 7 Constructions Ch – 8 Symmetry	<p>Constructions (using Straight edge Scale, protractor, compasses)</p> <ul style="list-style-type: none"> <li>• Drawing of a line segment</li> <li>• Construction of circle</li> <li>• Perpendicular bisector</li> <li>• Construction of angles (using protractor)</li> <li>• Angle <math>60^\circ</math>, <math>120^\circ</math> (Using Compasses)</li> <li>• Angle bisector- making angles of <math>30^\circ</math>, <math>45^\circ</math>, <math>90^\circ</math> etc. (using compasses)</li> <li>• Angle equal to a given angle (using compass)</li> <li>• Drawing a line perpendicular to a given line from a point a) on the line b) outside the line.</li> </ul> <p>Line Symmetry Or Reflection Symmetry</p> <p>Rotational Symmetry</p> <p>Tessellation</p>	Art integrated activity construct different types of angle on chart paper

December	Ch – 9 Perimeter and Area	INTRODUCTION TO AREA Introduction and general understanding of perimeter using many shapes. Shapes of different kinds with the same perimeter. Concept of area, Area of a rectangle and a square Counter examples to different misconcepts related to perimeter and area. Perimeter of a rectangle – and its special case – a square. Deducing the formula of the perimeter for a rectangle and then a square through pattern and generalisation.	Student will find the perimeter and area of surrounding 2D shapes
Unit Test	Ch Nos. 6, 7 and 9		
January	Ch – 10 Data Handling	(i) What is data - choosing data to examine a hypothesis? (ii) Collection and organisation of data - examples of organising it in tally bars and a table. (iii) Pictograph- Need for scaling in pictographs interpretation & construction. (iv) Making bar graphs for given data interpreting bar graphs+.	Art integrated activity student will collect data and make it bar graph
February	Ratio and proportion (Extra Topic)	Concept of ratio, proportion as equality of two ratios . Unitary method ( direct proportion ) Word problems	Art integrated activity . The ratio of students to teachers in a school is 4:6 if there are 60 teachers , how many students are there.
March	Final Exam 5,6,7,8,9 and 10
